EDUCATION

CSE / B-Tech

Amity University, Noida
20017 - 2021

12th / CBSE

Doon International School
2017

11th / ICSE

ST. Thomas College
2015

CERTIFICATIONS

[Oracle Certified Associate](#),
Java SE 8 Programmer

EXPERIENCE

CoffeeBeans Technologies / Software Engineer Intern- Remote

September 2020 to December 2020, **Responsibilities:**

- Code in programming languages for the desired features and functionalities
- Contribute for developing project architecture
- Troubleshoot setups and fix bugs
- Understand client requirements and help in transforming that into technical.

PROJECTS

[InnerClan](#) (on going project)

Description:

It is an E-commerce Application - Freelancing

Technologies :

React, SCSS, HTML, JS, Cookies, Spring (Boot+Security+JPA+MVC), JWTs, Auth 2.0(Google), Hibernate(ORM-JPA provider), Maven , MySQL.

My Contribution:

Worked as a Full Stack Developer. Designed complete backend, frontend-flow, database schema. Implemented Auth2.0 for backend and frontend. Implemented JWT flow for backend and frontend. Designed and Implemented all REST endpoints. Designed Service classes. Implemented 70% of the backend and 50 % of the frontend. Implemented Security with Spring Security.

Git Repository: [Backend](#) [Frontend](#).

[BigQ](#)

Description:

It is a Patent. Freelancing

Technologies :

React, SCSS, HTML, JS Spring (Boot+Security+JPA+MVC), JWTs, Hibernate(ORM-JPA provider), Maven, MySQL.

My Contribution:

Worked as a Full Stack Designed complete backend, frontend-flow, frontend UI, database schema. Implemented 100% of the backend and 60 % of the frontend. Implemented Security with Spring Security.

Git Repository : [Backend](#) [Frontend](#)

**note: Some changes have been made to the app. As we have to shift the project to someone else.*

Project-Tracker

Description:

It helps to maintain and plan your project and team members.

Technologies Used: React, SCSS, CSS, HTML, JS, Cookies, Spring (Boot+Security+JPA+MVC), JWTs, Auth(Google+Facebook+GitHub+Twitter), Hibernate(ORM-JPA provider), Maven, MySQL

Features:

Search, Filter, Categories, Sorting, Profile, Charts, Discussion Section, Insights, Roles, Progress, Project division to a hierarchy, Map, etc.

My Contribution:

Worked as a Full Stack DeveloperDesigned complete backend, frontend-flow, frontend UI, database schema. Implemented Auth(Google+GitHub+Twitter+Facebook) for backend and frontend. Implemented JWT flow for backend and frontend. Designed and Implemented all REST endpoints. Designed and Implemented Service classes. Implemented 70% of backend and 98 % of the frontend. Implemented Security with Spring Security.
